

# Could Be You

Michelle Wright

There are lovers that you take  
And compromises that you make  
When you know you're better off goin' without  
But it's hotter than the sun  
And you tell yourself that he's the only one  
'Til suddenly you feel the flame burnin' out

Well I been goin' round and round that wheel  
Just lookin' for a love that's real

Could you be the true light  
The one right  
In a sea of so many wrongs  
Could you be the sure thing  
The heart strings  
That will play a whole life long  
I know there's someone who's right for me  
Baby could you be

There's a moment, and I'm told  
That it's something to behold  
When love is gonna part the waves of all of your fear  
And it's gentle, and it's good  
And you want it, and you should  
Baby you're makin' me believe my time is here

'Cause I've been on this rollercoaster ride  
And I 've never felt so satisfied

Could you be the true light  
The one right  
In a sea of so many wrongs  
Could you be the sure thing  
The heart strings  
That will play a whole life long  
I know there's someone who's right for me  
Baby could you be

Will the lips that send this chill down my spine  
Be forever mine  
And baby will your sweet and gentle arms  
Forever keep me warm

Could you be the true light  
The one right  
In a sea of so many wrongs  
Could you be the sure thing  
The heart strings  
That will play a whole life long  
I know there's someone who's right for me  
Baby could you be
