

Alone

Midge Ure

Save me, save me, save me
Give this soul a helping hand
Help me, help me, help me
Help revive and cure this hopeless man
Nothing comes from nothing
And that's exactly what I am
Alone

D'you think if I
Let a little light into my safe, dark world
That what I'd see was frightening?

Sat behind the walls I'd built
To hide me from my feeling all alone
Alone
Alone

Save me, save me, save me
Give this soul a helping hand
Help me , help me, help me
Help revive and cure this hopeless man
Nothing comes from nothing
And that's exactly what I am
Alone

What if your hand
Plucked me out from obscurity
And pushed my stupid face around
To face my insecurity
Would I have the strength
To change my ways, not be alone?

Get myself a future
Find myself a new religion
Piece my live together
Or maybe not
I could revise so I could make it so much better
Better than the dream I've got
