

# Strobe Light

## Midnight Red

Flashes of electric dreams putting me in a daze  
And as crazy as it seems I'm still counting the days

Chasing your silhouette, always so hard to get  
Putting my fate into the place that we first met  
Thinking it was round midnight  
One of those friday nights,  
When I saw you under those bright red and blue  
It was like I just knew I had something to do

I'll be waiting here for you  
To meet me under the strobe light  
Told the dj not to move 'til you fall in my arms tonight  
Let's get it on (let's get it on) until the dawn  
We'll be closing down the club to your favorite song  
I'll be waiting here for you  
To meet me under the strobe light

Thought I had you for a minute  
Baby, where are you now?  
We were getting deep into it,  
Now you're lost in the crowd

Calling all of those blinding light (blinding lights)  
Move out of sight  
What a mistake I have to wait 'til the week goes by  
Standing around the floor, blown you right to the core  
Girl I want you under those bright red and blue  
It was like I just knew I had something to do

I'll be waiting here for you  
To meet me under the strobe light  
Told the dj not to move 'til you fall in my arms tonight  
Let's get it on (let's get it on) until the dawn  
We'll be closing down the club to your favorite song  
I'll be waiting here for you  
To meet me under the strobe light

You are my neon color lover (neon color lover)  
Someone that I'm yet to discover  
Communication lost in extacy  
Say that you'll dedicate the night to me

I'll be waiting here for you  
To meet me under the strobe light  
Told the dj not to move 'til you fall in my arms tonight  
Let's get it on (let's get it on) until the dawn  
We'll be closing down the club to your favorite song  
I'll be waiting here for you  
To meet me under the strobe light

See, baby, there's nothing between us  
See, girl, it's just you and me under my strobe light
