

Under way through a long tired night  
I return to the place I come from  
And the memories and the magic are still strong  
Is it home up ahead?

Under a sweet childhood sky  
I drift to the edge of the day  
Who's the shadow? Who's the stranger in my light?  
Is it home up ahead?

Will I find... will I find my way home?  
Will I find... will I find my way home?

Raise me an island at the edge of the sky  
Under the diamond stars  
Build this place of ours  
Drawn to the fire won't run any more...

I will travel in search of a sign  
Lost in the land that was mine  
But where I've been and what I've seen stands in-between  
Make a home in my heart  
Will I find... will I find my way home?  
Make a home in my heart  
Will I find... will I find my way home?  
Make a home in my heart  
Will I find... will I find my way home?  
Make a home in my heart  
Will I find... will I find my way home?

Raise me an island at the edge of the sky  
Under the diamond stars  
Build this place of ours  
Drawn to the fire won't run any more...  
Under the diamond stars

Raise me an island at the edge of the sky  
Under the diamond stars  
Build this place of ours  
Drawn to the fire won't run any more...  
Under the diamond stars...
