## **Cult Logic**

## **Miike Snow**

All my life I've been the slave of consequence wondering how this life could be so intricate. I wanna rewrite my heart and let the future in I wanna open it up and let somebody in

can you free me from the logic that I knew I believe it even if it is not true.

Am I falling asleep on my feet again? I call out, is anybody listening and it's like I'm diving into emptiness but at least there's something beating in my chest

can you free me from the logic that I knew I believe it even if it is not true.
