

Among The Stars

Pinder, Mike

Among the stars you and i
We learn to live the dream
Suspended here in time and space
Projections on a screen

We move through love to reach the light
That shines within us all
The knowledge of the universe
Live love instead of war

True freedom's spread around us
It's right here, right now, today
Humanity's forgotten how
To step back in the way

The way is dark and narrow
It climbs and then unfurls
Inner-space is where we find
Ourselves within all worlds
