

# Building The City Of Light

Mike Scott

I set my shoulder to a brand new groove  
Building the city of light  
Something wonderful on the move  
Building the city of light

I'm laying roots, planting seeds  
Building the city of light  
Grateful to give whatever it needs  
Building the city of light

I'm using my head, using my heart  
Getting the balance right  
I've got the horse before the cart

I'm using bricks and sticks and stones  
Building the city of light  
And sweat and soul and blood and bones  
Building the city of light

Technology, imagination  
Building the city of light  
Trust, belief and dedication  
Building the city of light

I'm using my brains, using my balls  
Keeping the goal in sight  
Feeling at heart a part of it all

I'm writing songs, singing 'em out  
Building the city of light  
I live the things I'm singing about  
Building the city of light

I'm working on myself and my stuff  
Building the city of light  
I just keep going when the going gets tough  
Building the city of light

Facing my beast, facing my fears  
Loving the darkness bright  
I'm like a mirror when the shadow clears

Got no politics, got no price  
Building the city of light  
I don't need saved, I don't need advice  
Building the city of light

I don't need freed, I'm already free  
Building the city of light  
All the answers I need are inside me  
Building the city of light

All may change in the blink of an eye  
All may change in the blink of an eye
