

Before It's Midnight

Miles Kane

I can't keep my distance from you
Don't know what else to do
You know the shape of the shadows I want to make,
Not before it's midnight

Spells and falling under
Can't take it much longer
You've got the face for the path I want to take
But not before it's midnight

Can't you see what you mean to me,
Can't you see what you mean to me,
Can't sit down signals are all around
Before it's midnight

So if it's still tomorrow you need
Girl that's alright with me
I want to race through the time it's gonna take
Before it's midnight

Can't you see what you mean to me
Can't you see what you mean to me
Can't sit down signals are all around
Before it's midnight
