

# Bombshells

Miles Kane

This world keeps on rotating and  
It's always changing who we are  
I can see that the past is fading but  
The future is waiting here to start

And then it hit me  
And it blew my mind  
Like a bombshell everytime  
Seize the moments and see the signs  
This world is yours,  
Yours and mine

If your world gets tilted sideways  
And you've lost your highway home  
Through the clouds  
All the stars are shining  
And the silver lining glows

And then it hit me  
And it blew my mind  
Like a bombshell everytime  
Seize the moments and see the signs  
This world is yours,  
Yours and mine

On the right track,  
On the right track, get on  
On the right track,  
On the right track, now  
On the right track,  
On the right track, yeah

I need excitement, I need a cure  
When I feel so insecure  
All the treasures in life's store  
That's where we are heading for

And then it hit me  
And it blew my mind (blew my mind)  
Like a bombshell everytime (everytime)  
I take my moment  
And you take yours (you take yours)  
I love this feeling and  
I want more [4x]
