

## Fine + 2 Pts

Minus the Bear

She said you look like a guy I used to know  
And she was right  
She stood biting on her lip  
Eyes upturned, and then she said  
I know, I know, I know we've met before  
I know, I know, I know we've met before

Transparent in the city today  
This air we breathe  
And our basic program is the same  
With her only

And I said you look too familiar to be wrong  
Just let me find the moment, let me find the face  
Dark eyes, dark hair  
And looks that need a song  
I think I loved you  
But I forget the place

Transparent in the city today  
This air we breathe  
And our basic program is the same  
With her only

We walked down this street we stand on  
With our arms on sunset boredom  
The substance is moving through our veins  
And you were the queen I was looking

Transparent in the city today  
This air we breathe  
And our basic program is the same  
With her only  
With her only words  
With her only words
