

The Fix

Minus the Bear

A swimming pool with no bodies
Is a problem that we can fix
He dropped his clothes on me
Chase lounge and asked
"Are you gonna come in?"
And in the night, the only light
Was the glow of the surface
As we slid in
The rest of them
Continue their talking
And drinking
They'll never notice us

So this is the difference between
Living and not living
These are just bodies
We have a purpose
And the gravity
Pulling us from them to we

The distance between our bodies
Is a problem that we can fix
They moved slow through the current
And found their bodies touching
Their heads to pull reminder
For some kind of kiss
As he slides in
The rest of them
Continue their talking
And drinking

So this is the difference between
Living and not living
These are just bodies
We have a purpose
And the gravity
Pulling us from them to we (2x)
