

# Every Time You Look Around

Miracle Of Sound

Troubles on the wild mind  
Questions in the sleepless nights  
Answers that we design  
Only come in mayes and mightes

This tide gets you down  
But swim up now, refuse to drown  
There's so much to learn  
You've just got to wait your turn

And when you think you've seen it all...

Every time you look around  
Life is gonna try to keep you down  
Every time you look away  
Someone's gonna come lead you astray

With the flick of a wrist  
And the wink of an eye  
With the twist of a tail  
On the roll of a die  
But keep your head held high...

Head high!!

Just because they told you so  
That doesn't make it true  
Sometimes the only sure things are  
The instincts inside you

And time ain't your friend  
Beauty always has to end  
It's fine to be scared  
We get here so unprepared

And when you think you've seen it all....

Every time you look around  
Life is gonna try to keep you down  
Every time you look away  
Someone's gonna come lead you astray

With the flick of a wrist  
And the wink of an eye  
With the twist of a tail  
On the roll of a die  
But keep your head held high...

And I know it's hard to crack a smile sometimes...  
The panic drills its way into your mind...

But don't lay down...  
Don't lay down....

Every time you look around  
Life is gonna try to keep you down  
Every time you look away

Someone's gonna come lead you astray

With the flick of a wrist  
And the wink of an eye  
With the twist of a tail  
On the roll of a die  
But keep your head held high...

Keep your head held high!!

Head high!!
