

# The Day The World Died

Miracle Of Sound

The day the world died  
We disappeared  
Past rusted turnstiles  
We persevere  
The wheels of conflict  
Still move and turn  
The day the world died  
Nothing was learned

And the future's a tunnel stretching endlessly  
Into nothing stumble in the black  
And the light at the end is but a treachery  
It will blind you and force you back

The day the world died  
We kindled doom  
We burned the outside  
Took to the gloom  
But history's lessons  
Are snubbed and spurned  
The day the world died  
Nothing was learned

День, когда умер мир

And the future's a tunnel stretching endlessly  
Into nothing stumble in the black  
And the light at the end is but a treachery  
It will blind you and force you back

Once more we divide  
From peace we turn  
The day the world died  
Nothing was learned
