

Country of the Future

Mirah

And is it the carnival
I can't hear, it's too far away
But love, with me you'll always stay
No matter which street you walk upon

It's the same sun on us shining
But see how mine is cold and pining
For the heat that you bring
When you take me in your arms

Oh love, come dance a simple step with me
Oh love, let's move in time, feel the one-two-three
Oh love, can you hear the ocean's heart as mine
How it swells in size

And is it the carnival
Can you hear all the songs they play
Turning the night into the day
You're lost in the atmosphere

And if you need some part of me
When you're alone there by the sea
I'll sing you this message through the shell
That you press to your cheek

Oh love, when you look at the stars at night
Remember, oh love, it's my longing, makes them shine so bright
Because love has both captured and set us free
To each our own country

Oh love, when you look at the stars at night
Remember, oh love, it's my longing, makes them shine so bright
Because love has both captured and set us free
To each our own country
