

## In Response To Stars

### Misery Signals

It was the last time we lost a fight without you  
And finally now you understand  
This was the dream and answer  
Never stop this  
All I wanted was you by my side  
Those were true days  
I watched them fall away  
These boards will break  
These boards will break against my ribs  
    We're shown ourselves  
With our pride atrophied  
A virtue burns hot enough to cauterize  
These boards will break  
These were true days  
I watched them fall away  
I don't blame the last step in the sequence  
It was your way  
So many times we cursed your name  
And I do not say I hold no regrets when I close my eyes  
Just think of the things we could have done  
    I've shown myself  
With my pride atrophied  
I hope you know we always loved you  
Forgive me for all things  
Even though I watched us fall away  
With determination we carry on  
And with determination we all must live on  
We've all learned things from those days  
I know that we all have grown  
Even I now feel a calm like I have never known
