Glance

Misty Edwards

```
I remember the first glance
I remember the first romance
I remember the first dance
When I fell in love with You (repeat x2)
When I fell in love

I thought that I would never know love
And maybe I would never know touch
And then You came and awakened me
And then You came unlocking me
I've never known a love like this
You've shown the Truth behind the myth, the mystery

And when it's all been said
When it's all been done
When the race is run
And this life overcome

I will remember Your love (4x)
```
