

Praying for Silence

Modestep

For all who want the painful truth
The girl always come back to you
Said we're praying for silence
And now we're burning with violence
For all who want the painful truth
The star always begins here
We've been praying for silence
And now we're burning with violence

And now we're burning with violence

'cause in this world
We work together make a world for all of us
Stop the pain
And blame it on the media
We make a world
'cause in this world
We work together make a world for all of us
Stop the pain
And blame it on the media
We make a world

For all who want the painful truth
The girl always come back to you
Said we're praying for silence
And now we're burning with violence
For all who want the painful truth
The star always begins here
We've been praying for silence
And now we're burning with violence

And now we're burning with violence

For all who want the painful truth
The girl always come back to you
Said we're praying for silence
And now we're burning with violence
For all who want the painful truth
The star always begins here
We've been praying for silence
And now we're burning with violence
