

Saved the World

Modestep

You take the time
Like no one does
Through highs and lows
You rise above

You saved the world
Now let the world save you
You saved the world
Now let the world save you

Through thick or thin
You always prevent
When I fall through a darken end
You hold out your hand
To a friend in need
You empower trust
To those who don't believe

You saved the world
Now let the world save you
You saved the world
Now let the world save you
Now let the world save you
Now let the world save you
Now let the world save you
Now let the world save you

You deserve a place
On higher ground
For the times you faced
No ones stopping you now

You saved the world
Now let the world save you
You saved the world.
