Saved the World

You take the time Like no one does Through highs and lows You rise above

You saved the world Now let the world save you You saved the world Now let the world save you

Through thick or thin You always prevent When I fall through a darken end You hold out your hand To a friend in need You empower trust To those who don't believe

You saved the world Now let the world save you You saved the world Now let the world save you Now let the world save you Now let the world save you

You deserve a place On higher ground For the times you faced No ones stopping you now

You saved the world Now let the world save you You saved the world.

Modestep
