

Show Me a Sign

Modestep

This is for the ones who care
The ones who listen know a way there
This one's for you, now show me a sign

This is for the ones who care
If you already know the bad that's been said
This one's for you, now show me a sign

Someone raise a lights up
Light up the sky above
If you're with me now show me a sign

Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign

(Put your fuckin' lights up)

This is for the ones who care
This is for the ones who care
This is for the ones who care
This is for the ones who care

Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign

Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign

(Put your fuckin' lights up)

Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign

Someone raise a lights up
Lights up the sky above
If you're with me now show me a sign

(Put your fuckin' lights up)
