

# Take it All

Modestep

I've seen your life  
Like never there been seen before  
Cuts here with time  
Then open when you take a fall  
I've seen your lie  
Like never there been seen before  
Cuts here with time  
Let's hope your mind can take it all

Let's hope your mind can take it all [7x]

I've seen the lie  
When you come up to plead and find  
Familiar sight  
You make it hard to underline  
You know my mind  
Trying not to make it fall  
Familiar signs  
Let's hope your mind can take it all

Let's hope your mind can take it all [4x]
