

Take it All

Modestep

I've seen your life
Like never there been seen before
Cuts here with time
Then open when you take a fall
I've seen your lie
Like never there been seen before
Cuts here with time
Let's hope your mind can take it all

Let's hope your mind can take it all [7x]

I've seen the lie
When you come up to plead and find
Familiar sight
You make it hard to underline
You know my mind
Trying not to make it fall
Familiar signs
Let's hope your mind can take it all

Let's hope your mind can take it all [4x]
