

## She's An Angel

Moe Bandy

That's not really her she's not herself tonight  
Or she'd never let someone like you hold her so tight  
She'll leave here like she came here very much alone  
She's an angel she just left her wings at home.

She'll dance with you and drink with you  
And listen to your lies  
But she's not the kind you had in mind  
That's only her disguise.

That's not really her she'd never be this loud  
She's a good girl over acting there's one in every crowd  
For your girl once was my girl before I did her wrong  
She's an angel she just left her wings at home.

She's an angel she just left her wings at home...
