

Let Her Go

Mohombi

Way, way, way, way did I let her go
You wanna be the light when it's burning low
Only miss the Sun when it's starts to snow
Only know you love her when you let her go
You only know you'll be high when you'll feel alone
Only hate the road when you miss her holds
Only know you love her when you let her go
Why did I let her go?
Why did I let her go?
Ai-ai-ai-ai I try to go back to figure out why it's over
You and me together, though the world and see '
You wanna be the light when it's burning low
Only miss the Sun when it's starts to snow
Only know you love her when you let her go
You only know you'll be high when you'll feel alone
Only hate the road when you miss her holds
Only know you love her when you let her go
Yes I try to do better, better then the men before me
We should think what we'll do cuz the love don't come easy
Girl you and me together , we're nothing that the world had see
ever
You wanna be the light when it's burning low
Only miss the Sun when it's starts to snow
Only know you love her when you let her go
You only know you'll be high when you'll feel alone
Only hate the road when you miss her holds
Only know you love her when you let her go
Try to make the right cuz I can make you, make you right
I can't make you right without you baby by my side
Try to make the right cuz I can make you, make you right
I can't make you right without you baby by my side
I try to make the right cuz I can make you, make you right
I can't make you right without my baby by my side
Try to make the right cuz I can make you, make you right
You wanna be the light when it's burning low
Only miss the Sun when it's starts to snow
Only know you love her when you let her go
But I don't need a light when it's burning too slow
I don't need the Sun when it's start to snow
All I need it's you and I can't let you go
