

Romance

Molella

When I sleep
I can dream about your love
When i hold you in my arms
We can fly to the stars above
In the night in the night in the night
All my troubles desappear
We have nothing else to fear
Open your eyes and see the light x2

See the light
See the light shining in your eyes
Let me be your dream tonight
Let me take you to take you to paradise
Where i know that we belong

See the light
See the light shining in your eyes
Let me be your dream tonight
I write this romance for you

Romance, across the universe
For your love, like everyone should loove x2

See the light
See the light shining in your eyes
Let me be your dream tonight
Let me take you to take you to paradise
Where i know that we belong

See the light
See the light shining in your eyes
Let me be your dream tonight
I write this romance for you
