

Love Get Out Of My Way

Monarchy

clinging to your fever
wash me down
let me go to shiver
spread it all around
push up close
to fill the queues but

love get out of my way
get out of my way
love what ya doin to me
love get out of my way
get out of my way
love what ya doin to me
ooooh

pick me up I'm breakin
cool my mind
still cold I'm aching
you know the kind
right on course or we could crash

love get out of my way
get out of my way
love what ya doin to me
love get out of my way
get out of my way
love what ya doin to me
ooooh

your in my bones in my ears
in my strokes
I have been saved from the moon
by your touch but its too much
too much too soon
its too much
too much too soon

So love get out of my way
get out of my way
love what ya doin to me
love get out of my way
get out of my way
love what ya doin to me
love get out of my way
get out of my way
love what ya doin to me
love get out of my way
get out of my way
