

## Watch Me Fade

Monster Magnet

We're all sinking in our hearts now, people  
100 screens upon the wall  
A pretty cloud of confusion come to cover us all  
You're a smoking hot mutation, baby  
You nearly tanned yourself to death  
The way you learn that worm just makes me lose my breath

Well pull me up and watch me fade  
Your dirty mind is driving me insane  
Those good old days ain't coming back again, oh no

So keep your eye upon the saucer, baby  
Ignore the world as it bleeds  
You've got your phone and your mirror, what else do you  
need?

Well pull me up and watch me fade  
Your distorted lies just say the same old thing  
My peace of mind ain't coming back again  
While the hydra's head just started raping my brain  
(While this hydra head keeps raping my brain)  
(While the hydra's head going straight to my brain)
