

# Destructos vs. the Earth / Attack

Morbid Angel

Our patience gone for your folly  
There'll be no restraint  
Though it's been urged there's no warrant  
To let you remain  
Ten thousand years  
For a test you failed miserably  
The target's locked  
And this planet will soon be human free

March, March

... No hero should rise amongst you  
... Don't prolong your misery accept your fate

Laser vision has monitored for centuries  
We've gathered evidence  
We know that you are disease

It matters not...  
What counter measures you employ  
You're not the first ones that we've destroyed  
We take charge the task at hand  
Rid the third planet of life...

Destroy man  
We're marching  
Destructos marching on man  
We're marching  
Destructos marching on!

We're marching  
Destructos marching on!

Convoke the data  
Attack imminent  
Final closure on this failed earth experiment

It matters not...  
What counter measures you employ  
You're not the first ones that we've destroyed  
We take charge the task at hand  
Rid the third planet of life...

Destroy man  
We're marching  
Destructos marching on man  
We're marching  
Destructos marching on man  
We're marching  
Destructos marching on man  
We're marching  
Destructos marching on!

Destroy man  
We're marching  
Destructos marching on!  
We destructos march

No mercy from annihilation  
No mercy from destructo-nation  
Seek Total annihilation  
No mercy from destructo-nation

We're marching on  
Through the sordid human remains  
The dead attest... Your resistance in vain  
Ten thousand years and you never evolve?  
It's over soon for humans one and all  
The facts have shown all resources you waste  
Our eyes have seen all your greed and distaste  
You feeble beings, just a blight to this earth  
Destructos marching on...
