Lighten Up

Morcheeba

I can feel a storm brewing over nothing We were having fun There's no harm done there You need attention I can see you're sulking It's about time that you learn to share

Lighten up It's gonna brighten up I want to play You're in the way of our sunshine Lighten up It's gonna brighten up Just let it go And I will throw you a lifeline

I don't know what happened To those resolutions We think we found the truth at last When it escapes Inside the mirror is a false impression I can feel so swollen When I'm in good shape

Lighten up It's gonna brighten up I want to play You're in the way of our sunshine Lighten up It's gonna brighten up Just let it go And I will throw you a lifeline

Lighten up It's gonna brighten up I want to play You're in the way of our sunshine Lighten up It's gonna brighten up Just let it go And I will throw you a lifeline

Lighten up It's gonna brighten up I want to play You're in the way of our sunshine Lighten up It's gonna brighten up Just let it go And I will throw you a lifeline
