## **Under The Surface**

Deep under the surface of your educated minds There's a beast (roaming the punctures) Looks like race persistance

Every day we see the regression All (the man) just so sick In a fortress of aggression Who (get to proclaim) death

Every race and culture (made us feel we're insecure) But when we are in trouble Law is out of (action)

Every day we see the regression And it seems like all is lost In a fortress of aggression Who (always has been the) cost

It's the end of (mankind's union) The reflection of our greed As we rise we fall, do you wonder at all All rain will come to an end

(knifes cut wounds) so deep But we still want to deny That we're just another creature In the history of life

I believe in (just illusion) Human is (the just distracts) Now we come to this conclusion There must be something deep under the surface

There's no trust and peace Cause we (can deceit) All (victory and daydream) Look like race persistance

The end of (mankind's union) The reflection of our greed As we rise we fall, do you wonder at all All rain will come to an end

(knifes cut wounds) so deep But we still want to deny That we're just another creature In the history of life

## Morgoth
