Come Over

Morphine

After you go through the lights take the first left and the next right Come in the back door c'mon inside Don't mind the dog he won't bite

I'll tell you where to park your car Around the corner in the dark If he finds you in my home You know he's gonna kill us both

Come over, come over, come over, come over Come over, come over, come over tonight

Yeah!

That's it, that's it, that's it C'mon c'mon c'mon inside Up the stairs, be right behind Draw the shade, kill the light We don't care tonight! Not tonight

Come over, come over, come over, come over (4x)Come over, come over, come over, come over tonight
