

## In Your Lap

Morrissey

The Arab Spring called us all  
The people win when the dictators fall  
I heard a bang and an almighty crack  
And I just want my face in your lap  
The people sing when the warlords all burn  
Do not feel sad, it's simply their turn  
They tried to wipe us clean off the map  
And I just want my face in your lap  
I just want my face in your lap

I rescued you in so many ways  
You're good for a laugh, that's all you can say  
Summer is winter and winter prevails  
And I'm so tired of counting the days  
I'm so tired of counting the days

The security force is always the worst  
Government advised, they're spraying our eyes  
They live to kill and they love just to harm  
And I'm dreaming of touching your arm
