## In Your Lap

Morrissey

The Arab Spring called us all The people win when the dictators fall I heard a bang and an almighty crack And I just want my face in your lap The people sing when the warlords all burn Do not feel sad, it's simply their turn They tried to wipe us clean off the map And I just want my face in your lap I just want my face in your lap

I rescued you in so many ways You're good for a laugh, that's all you can say Summer is winter and winter prevails And I'm so tired of counting the days I'm so tired of counting the days

The security force is always the worst Government advised, they're spraying our eyes They live to kill and they love just to harm And I'm dreaming of touching your arm
