## **Rebellious Youth**

Rebel with a cause, frustration's fair game To bite the hand that feeds Staggered by the chains of youth around you Those chains they make you bleed Burning your bridges, taking chances Living in a dream The hands of the clock move slowly Toward individuality

Don't try to run my life Just let me be myself Making my own mistakes Of the rebellious youth

Eternally try to rise above it all The torment that you found Authority puts up a smoke screen of lies Don't let the bastards drag you down Fist in the air for what you think is right Insurmountable ignorance, don't try to fight it Seal your blood in your youth and remain Forever young, forever insane

So many been before You're not gonna change the world Forever we seek the truth Of the rebellious youth

Lies... Anger... Torment... Humiliation Lies... Anger... Torment... Adolescent alienation

Live your life for yourself Your life, life, life, life, life, life

Don't lie down and take it all The clone is always to conform Forever we seek the truth Of the rebellious youth

## Mortal Sin
