

Side Effect

Mortal Sin

Do you hear me ? I know you do
You always have and you always will
The medication to cease my voice
You wanna kill me, you'll kill yourself

Hey, you'll get so lonely without me friend
Yourself alone inside
You'll have to like me, or hate yourself
You know we coincide

But it never ceases
Medication increases the abnormalities I contend without choice

Administer the cause, the voices on pause
I must suffer the clause of side effect

Prepared for my hell inside myself
It's out of my control
I start to grin my, my morbid smile
Await my private hell on earth
But it never ceases
Medication increases the abnormalities I contend without choice

Administer the cause, the voices on pause
I must suffer the clause of side effect

I get so lonely without you friend
Myself alone inside
Don't have to like you, to hate myself
I live behind your eyes

But it never ceases
Medication increases the abnormalities I contend without choice

Administer the cause, voices on pause
I must suffer the clause of side effect
Administer the cause, the voices on pause
I must suffer the clause of side effect

Side effect, side effect, side effect
