

# First Man to the Grave

Morten Harket

Night after night  
Day after day  
Step by step  
We came to this race

And it's the first man to the grave

Watch this busy street  
A million running feet  
Running in their lives  
In waves and in heaps

And it's the first man to the grave

My love  
Come stay with me tonight  
It really matters who we are

Hey my busy friend  
It doesn't matter who will win  
Running out of faith  
And as long as we're all in

And it's the first man to the grave

Words can take us many places  
But tonight we are going far

And we who've got so many faces  
We've only got one heart

The first man to the grave

My love  
Come stay with me tonight  
It truly matters who we are

And see if we can keep the silence  
You and I are gonna see the stars

And we who've got so many faces  
We've only got one
