

There Is a Place

Morten Harket

Baby, there is a place for you and me
Sooner or later we shall see
Through the tears we cry

And baby, our time has only just begun
We are different, we are one
What more do we need

There's a silent world
Shining from afar
There's a drop of life
Among the stars
That is where we humans are

Put your darker thoughts aside
Lay back in my arms tonight
Everything is right

And join me
All the things that we will see
Soon will turn to memories
We better stay awake
Every morning brakes

And, there's a silent world
Shining from afar
Just a drop of life
Among the stars
That is where we humans are
