When I Reached the Moon

Morten Harket

When I reached tje moon, It turned to stone Since I won your heart I've been alone I was drawn to the light, Circling 'round I should have kept My feet on the ground

I dreamt of you, my love The dream came true I came to know a way of Losing you

The feelings that you gave me I've never known Since I won your heart I've been alone I'm on the dark side I'm leaving soon All I ever cared for I can see from the moon
