

Closed Casket

Mos Generator

Cancer seeper
Lifeline reaper
Never go outside
A death filled rain falls from the sky

No heat seeker
Fever preacher
Feel the temperature rise
Locked inside a slow demise

Close to the edge
Closer to death
Removing the life remains of another...

God fearing rat, human disease
Family man, street walkin' sleeze
Mother in love, father to none
Each got a fear that their soul ain't the one

Visions of light
Bright as the sun
Birth of the death means the end of another

The light of the dawn it never seems to come
Never again, we'll never see the sun
The light of the dawn it never seems to come
Never again, we'll never see the sun
Pale dark light
Bring morning the night
Make black of the sight
The pale dark light
