

# Torches

Mos Generator

I stumble the road with you by my side  
And if I can't make it you won't pass me by  
There's darkness ahead and darkness behind  
But lighting my way is a fire inside

Torches may fade but their light doesn't lie  
I'll take my chances with you every time  
Torches ahead fade the darkness behind  
To numb the pain of the world passing by

I carry the weight of a life I deny  
If I don't give in I may never get by  
I feel you around me - I feel you inside  
My heart may be withered but my heart hasn't died

Torches may fade but their light doesn't lie  
I'll take my chances with you every time  
Torches ahead fade the darkness behind  
Torches may fade but their light doesn't lie

Torches may fade but their light doesn't lie  
There's truth in your vision that your heart can't deny  
Torches may fade but their light doesn't lie  
There's truth in your vision, place your heart up on high

Torches may fade but their light doesn't lie
