

Fading Colours

Mostly Autumn

As we fade away
Every single day
Is dying away in the sky

And we're nowhere near
Kansas anymore
We're not even over the rainbow

They tore the rudders from our ships
And turned the forest inside out
They broke the ladders that took us to the moon
And pulled the anchors from the sky

As we fade away
Every single day
Is dying away in the sky

And we're nowhere near
Kansas anymore
We're not even over the rainbow

They stole the colours from the snow
Put them away like smoke across the stage
A billion shadows to navigate
Spiralling down to the grave

As we fade away
Every single day
Is dying away in the sky

And we're nowhere near
Kansas anymore
We're not even over the rainbow

So we fade away
Every single day
Is dying away in the sky

And we're nowhere near
Kansas anymore
We're not even over the rainbow

So we fade away
The ghostly shade of a tear
Falls in an ocean of heartbreak
