Until The Story Ends

Mostly Autumn

You standing The ocean a mirror A black star is rising It follows the path to your open hands Into your open arms

The wind blows the laughter The laughter commands us Spirits are dancing Love in your eyes A miracle It's a miracle

Until the story ends To you my love To you my love

Bound by the water For in the mist A rainbow surrounds us From sunlight that chimes Behind your eyes Into my eyes

Until the story ends To you my love To you my love

Until the story ends To you my love To you my love

Until the story ends To you my love To you my love
