

Disappear

Motion City Soundtrack

To the deep end. To the hard line.
Hold this trick together, man.
Hold this trick together if you can.
Little fevers wrapped in dedication
All strung out on novelty
Collapse yourself and try to comprehend
An angry island, a bitter bee sting
Severing each artery
To free the self and fix the in-betweens.
Isolation, mark the earth around you
Guess who's on the waiting list
I'll let you in on something secret

I can disappear
Anytime I want to, time I feel you
Shovel through my skin
I am with you til the end

First you breathe out
Then you have to breathe in
Lash yourself repeatedly
Until it sticks, until it sticks
Under the eyelids, carry on cadaver
Festering interiors
All hollow breach and vapor silhouette
Need medication, more medication
Coursing through your inner states
All matter grey confused and counterfeit
Kamikaze, sear the blood inside me
Guess who's got it figured out
I'll let you in on something secret

I can disappear
Anytime I want to, time I feel you
Shovel through my skin
I am with you til the end

And I can decompose
When it suits me I accelerate it
Wicked on all fours,
I surrender to the storm

You'll never know how it feels
You'll never know how it feels
Can you feel it?
Can you feel it?

I can disappear
Anytime I want to, time I feel you
Shovel through my skin
I am with you til the end

I can decompose
When it suits me, I accelerate it
Wicked on all fours,
I surrender to the storm

And I can disappear
Anytime I want to, time I feel you
Shovel through my skin
I am with you til the end
I'm with you til the end
