

# Point of Extinction

## Motion City Soundtrack

Are you listening, Javelina?  
Every corner of the coast is still clear  
All dressed up with some medicine for luck  
How I hope that you're still here when I return

Burning bridges is a form of suicide  
I saw the fires as the ghost of my life  
Passed me by and there's nowhere you can hide  
From the lessons or the lies that bind them

I'm so tired  
I've had enough  
If there's one thing I've learned  
You'll always get burned  
But you'll never give it up

Can we count on our conversations  
to restore us like energon cubes  
Made one wish for a permanent kiss  
That would echo through these bones like arsenic  
I can figure out the point of anything  
Just not as quick as I can mess up my life  
With all my dreams hooked to hospital machines  
I think, "let's try redefining beautiful."

I'm so tired  
I've had enough  
If there's one thing I've learned  
You'll always get burned  
But you'll never give it up

This is the best that it will get  
(Yeah yeah yeah, give it up, give it up)  
This is the best that it will get  
(Yeah yeah yeah, give it up)

I can figure out the point of anything  
I can figure out the point of anything  
I can figure out the point of anything  
I can figure out the point of anything  
I can figure out the point of anything  
I can figure out the point of it

I'm so tired  
I've had enough  
If there's one thing I've learned  
You'll always get burned  
But you'll never give it up

I'm so tired  
I've had enough  
If there's one thing I've learned  
You'll always get burned  
But you'll never give it up
