

# Victory or Die

Motörhead

Victory or die!

What do you say what I can ever do for you  
What are we gonna do to pass the time  
What do you care when you find that life's unfair  
Equality is just a state of mind  
Believe whatever is right what's right for you tonight  
You know where to draw the line

What have you done what's in your mind what do you need  
Where shall we go to let it out  
What have you seen, we don't know where you've been  
Life so often blows your candle out  
Believe in what is right, what's right for you tonight  
Who knows what the fuck it's all about

Look up and see the flying saucers cruising in the sky  
I saw one myself it ain't no lie  
Look down and see the road you're on as if you are on a marathon  
That's the spirit victory or die

What did they say what have we learned, what do we know  
What shall we do to even up the score  
What do you find, if you find that you've gone blind  
Darkness is a thing we've seen before  
Believing is your right all right, whatever lights your light  
You always end up on the killing floor

Look around and see the soldiers, see them marching off to war  
Take a careful look as the swing by  
They're all heroes but they don't know what they're fighting for  
That's the spirit victory or die

Watch out for the monsters in the alleys of the night  
They're always hungry look 'em in the eye  
They're looking at your daughters, they've seen the flying saucers  
You have to tell them victory or die... or die
