

Real Eyes

Motograter

Energized by light, despise my fright
Holdin' me down with all your might
Knights ignite, and draw your swords
Struggle and force, Be with you
The jedi needs a tissue
Us crew, Mutha fuckas I miss you
Brains confused like a bum on booze, snooze you loose
Incoherent to my brain state, damn I'm baked
Logics progressed by the stakes, on an average basis
Realize your life, and through your last kiss

Realize your lies
Contemplate your life
Unsuccessful tries
Obsessed with death
Take your last breath

America one nation under a god indivisible
Comprehensible logics, Hooked on phonics
Books on chronics
As my conscience grows
Into a new realm, where everyone's soul begins to glow
Minds explode and carrode into portholes of endless roads
Who is the chef, he is unknown
Dreamin' of death, conflict of interest I must confess
The evil plots, and tests realize your last breath

Realize your lies
Contemplate your life
Unsuccessful tries
Obsessed with death take you last breath
I love you
I hate you
I feel this pain inside of me
I hate you
I love you
I feel your pain inside of me

Believe the truth, I snoop upon Allies
Why lie, I discover spies
my eyes are dreamin' while my brain is seein' complicated beings
With devilish screams of taken over my thoughts
convincing me that I bought
Things that I forgot, Are they against me on this evil plot
I feel the shame
No energy remains, to reconstruct my pain withhold the truth
Convince these lies
Realize your life and take your last breath

Realize your lies
Contemplate your life
Unsuccessful tries
Obsessed with death take your last breath
I love you
I hate you
I feel this pain inside of me
I hate you

I hate you
I'll pray for thee in time of need
I love you
I hate you
I feel this pain inside of me
I hate you
I hate you
I'll pray for thee in time of need
