

## Dead Army

Motorjesus

as you can see i grasp the bullets that surround me  
as you cant see, slowly life turns into stone  
in these times when i could not breathe  
summon the demons that i need  
hit the gas tryin to not look backward anymore

it comes back to you - but can you follow

all alone - i deny, i can swear - but i lie  
still you're the dead army, on this path, where i go  
hit the ground and i know  
that you're still casting the shadows

do you think i am the alpha male  
the ultimate sensation  
i guess i prove you wrong  
as escaping sort of running  
with the dice and booze in hand  
separating good from evil  
but you've got it in your hands

i'm the running man - there's no tomorrow

all alone - i deny...

you pray forgiveness, you did it  
you don't even tried  
the oath, your promise  
to never live inside a lie

the air you're breathing  
i'm screaming  
as heavens collide  
but you never tried...

all alone - i deny...

the dead army - the dead army - the dead army
