

## Rust

Motorjesus

but i'm still running in the night, and i refuse to see it  
off the track narrow and blind, and i can sense and feel it

another demon from the right, can't find the right direction  
engines broken, but i see, one road and one solution

one smaller step, one giant leap, moving onward to the evidence  
to proof it's not too late, to regain more of the confidence

what for is this life? more than just to steal away  
to throw it all away

i'm awaiting, fight that disease  
eternal highways, where the rust is inside me

when wheels are off, how can you run  
to find the aim, the overdrive  
black and the grey, dark and the light  
my navigation denies me

trust in this machine  
more than ever, it's the same  
to come back once again

i'm awaiting ...

my engine, final release, eternal highways  
where he's watching over me

tum around, turn over now - turn around, turn over now  
in reverse, turn over now, turn around, turn over now

i'm awaiting ...

my engine, final release  
eternal highways, where the rust is inside me  
rust is inside me ...
