

The Evil

Motorjesus

Cold is the grave, still alive where you lay
Ressurrected from out of the cold
You got to see on this cemetery
You've been held by the shadow of old

Alive no more
Bleeding no more

In your eyes, no disguise
Don't fear no evil
Here inside, killing light
Don't fear no evil

Heaven is lie, but you try to unwind
Every thought, it is gone in the end
Haunting the night, seek for blood
To remind and the greed in control is at hand

Alive no more
Bleeding no more

In your eyes, no disguise
Don't fear no evil
Here inside, killing light
Don't fear no evil

All you've never known
All you've ever felt
Evershining dead walks still
All forever damned
All is broken down
Driven by the lifeless will

In your eyes, no disguise
Don't fear no evil
Here inside, killing light
Don't fear no evil
