

West Of Hell

Motorjesus

Emerged from blackness I am, but for a reason - challenged the lions but now it's gone One of the few and not the inferior - I never want it to end - before I ever reach the day

All I know - all engines go - burn bridges form my past - I'm from the west of hell I realize - there's no disguise - the king that is myself - I'm coming from the west of hell

I'm takin' you for a ride, to my universe - from blackest cities to ashen ground We're heading for disaster - shakin' hands with damnation - to the limit, to the very overload

All I know - all engines go - burn bridges form my past - I'm from the west of hell I realize - there's no disguise - the king that is myself - I'm coming from the west of hell

What I know - on the run and on the go - it's unknown - comin' for the kill - an I'm there!

All I know - all engines go - burn bridges form my past - I'm from the west of hell I realize - there's no disguise - the king that is myself - I'm coming from the west of hell From the west of hell yeah...
